

Table of Contents

Construction of DBMS for the Warehouse of Textile Enterprise Based on RFID Technology	1
Ruru Pan, Jihong Liu, Weidong Gao, Hongbo Wang, Jianli Liu	
Reliability Research of Software System for Subsea Blowout Preventers.....	7
Baoping Cai, Yonghong Liu, Zengkai Liu, Xiaojie Tian, Shilin Yu	
Adaptive User Interface Modeling Design for Web-based Terminal Middleware	13
Sunghan Kim and Seungyun Lee	
Study on Improving Energy Saving for Old Buildings with Daily Energy Conserving Index.....	19
Yan-Chyuan Shiau, Chi-Hong Chen	
Method of Unified Communications and Collaboration Service in Open Service Platform Based on RESTful Web Services.....	25
Sunhwan Lim, Hyunjoo Bae	
Original-page small file oriented EXT3 file storage system.....	32
Zhang Weizhe , Hui He, Zhang Qizhen	
An NMS Architecture for Large-scale Networks	38
Byungjoon Lee, Youhyeon Jeong, Hoyoung Song, Youngseok Lee	
Efficient Data Transmission Technique for Ubiquitous Healthcare Systems.....	46
Yoon Hyun Kim, Jin Young Kim	
Specification and Detection of Code Smells using OCL.....	55
Tae-Woong Kim, Tae-Gong Kim, Jai-Hyun Seu	
Temporal Distance based Particle Domain Selection Method for Large Scale Streaming System.....	61
Jun Pyo Lee	

Establishment of Fire Control Management System in Building Information Modeling Environment.....	67
Yan-Chyuan Shiau, Chong-Teng Chang	
Development of Computer-Aided Medication Education for Drug Abuse Prevention	73
Seong-Ran Lee	
Concurrent Computation for Genetic Algorithms	79
Kittisak Kerdprasop, Nittaya Kerdprasop	
A Practical Context Awareness Information System for VANET based on IEEE 1609.....	85
Tzu-Kai Cheng, Jenq-Shiou Leu, Ing-Xiang Chen, Jean-Lien C. Wu, Fellow,IEEE, Zhe-Yi Zhu	
Evaluation of Assessment Tools for High-care Student Groups in Vocational High Schools.....	91
Chen-Feng Wu, Chun-Ta Lin, Pei-Min Wang and Pei-Ru Wang	
Generating Test Cases for Cyber Physical Systems from Formal Specifications.....	97
Lichen Zhang, Jifeng He and Wensheng Yu	
Reliable Integration of Exact and Approximated Arithmetic with Three-Valued Logic in Python.....	104
Reeseo Cha, Wonhong Nam, Jin-Young Choi	
Experiment study of Android Software Test using Moment Invariants Algorithm.....	110
Won Shin, Chun-Hyon Chang	
Parallel Simulation Testbed for Swarming MAVs	116
Ge Li	
Formal Specification for Transportation Cyber Physical Systems	122
Lichen Zhang, Jifeng He and Wensheng Yu	

Linking Data for an Information Support System in Traditional Korean Medicine	128
Hyunchul Jang, Yong-Taek Oh, Sang-Kyun Kim, Anna Kim, Sang-Jun Ye, Chul Kim, Mi-Young Song	
A Proof-of-Concept of D3 Record Mining using Domain-Dependent Data	134
Yeong Su Lee, Michaela Geierhos, Sa-Kwang Song, and Hanmin Jung	
Web Taxonomy Fusion using Topic Maps-driven Ontological Concepts and Relationships	140
Ing-Xiang Chen and Cheng-Zen Yang	
A Memory Management Scheme for Hybrid Memory Architecture in Mission Critical Computers	146
Soohyun Yang and Yeonseung Ryu	
NC-based Interoperability Synergy Assessment Model	152
Hyun-sik Son and Tae-gong Lee	
Performance Evaluation of Recursive Network Architecture for Fault-tolerance	158
Minho Shin, Raheel Ahmed Memon, Yeonseung Ryu, Jongmyung Rhee and Dongho Lee	
Implementation of Buffer Cache Simulator for Hybrid Main Memory and Flash Memory Storages	164
Soohyun Yang and Yeonseung Ryu	
Critical Health Monitoring with Unreliable Mobile Devices	170
Minho Shin	
Confidence Metric in Critical Systems	176
Minho Shin	
Survey on Simulation Framework for Intelligent Transportation Systems	182
Hyungsoo Kim, Beomseok Nam, and Minho Shin	

Current State of Capability-based System of Systems Engineering in Korea Ministry of National Defense.....	186
Jae-Hong Ahn, Yeonseung Ryu and Doo-Kwon Baik	
Distributed and Self-adaptive Cluster-head Selection Algorithm for Hierarchical Wireless Sensor Networks.....	192
Sai Ji, Liping Huang, Chang Tan, Jin Wang	
An architecture description method for Acknowledged System of Systems based on Federated Architecture.....	199
Jae-Hong Ahn, Yeunseung Ryu and Doo-Kwon Baik	
Scenario Generation for Model Checking Operating Systems	205
Nahida Sultana Chowdhury and Yunja Choi	
Detecting Accesses of First Data Races in Parallel Programs with Random Synchronization	208
Hee-Dong Park, and Yong-Kee Jun	
Visualizing Data Races in Concurrent Signal Handlers	211
Lin Gan, Guy Martin Tchamgoue, and Yong-Kee Jun	
An Automatic Parallelization Scheme for Simulink-based Real-Time Multicore Systems Systems.....	215
Minji Cha, Seong Kyun Kim, and Kyong Hoon Kim	
Efficient Data Race Detection for Structured Fork-join Parallelism	218
Ok-Kyoon Ha and Yong-Kee Jun	
Tracing Logical Concurrency for Dynamic Race Detection in OpenMP Programs	222
In-Bon Kuh, Ok-Kyoon Ha, and Yong-Kee Jun
