

Preface

The Committee on International Economic and Policy Reform is a non-partisan, independent group of experts, comprised of academics and former government and central bank officials. Its objective is to analyze global monetary and financial problems, offer systematic analysis, and advance reform ideas. The Committee attempts to identify areas in which the global economic architecture should be strengthened and recommend solutions intended to reconcile national interests with broader global interests. Through its reports, it seeks to foster public understanding of key issues

in global economic management and economic governance. Each Committee report will focus on a specific topic which will emphasize longer-term rather than conjunctural policy issues.

The Committee is grateful to the Alfred P. Sloan Foundation* for providing financial support and to the Brookings Institution for hosting the committee and facilitating its work. Quynh Tonnu provided excellent administrative and logistical support to the Committee.
