

2	Persistence, Amplification and Instability	10
2.1	Persistence	10
2.2	Dynamic Amplification	14
2.3	Instability, Asymmetry, Non-linear Effects and Volatility Dynamics	22
3	Volatility, Credit Rationing and Equilibrium Margins	29
3.1	Credit Rationing	29
3.2	Delevering due to Margin/Haircut Spiral	31
3.3	Equilibrium Margins and Endogenous Incompleteness	33
4	Demand for Liquid Assets	40
4.1	Smoothing Deterministic Fluctuations	41
4.2	Precautionary Savings and Uninsurable Idiosyncratic Risk	46
4.2.1	Precautionary Savings	46
4.2.2	Constrained Inefficiency	51
4.2.3	Adding Aggregate Risk	54
4.2.4	Amplification Revisted and Adding Multiple Assets	55
5	Financial Intermediation	65
5.1	Liquidity Insurance and Transformation	66
5.2	Design of Informationally Insensitive Securities	71
5.3	Intermediaries as Monitors	72
5.4	Intermediaries' Fragility: Incentives versus Inefficiency	76
5.5	Intermediaries and the Theory of Money	79
