

Kim A. Lichtenberg received the B.S. degree in engineering science from the University of Virginia, Charlottesville, and the A.M. degree in earth and planetary sciences from Washington University, St. Louis, MO, where she is currently working toward the Ph.D. degree at the McDonnell Center for the Space Sciences and is working on mineralogy and stratigraphy of the martian crust.

Peter J. Cavender was a Computer Engineer with the Applied Physics Laboratory, Johns Hopkins University, Laurel, MD, who specializes in ground support equipment and signal processing. He is currently with Comtech Mobile Datacom Corporation, Germantown, MD.

Sandra M. Wiseman received the B.S. degree in geology from the University of Tennessee, Knoxville, and the A.M. degree in earth and planetary sciences from Washington University, St. Louis, MO, where she is currently working toward the Ph.D. degree at the McDonnell Center for the Space Sciences.

David C. Humm received the B.S. degree in physics and astronomy from the University of Iowa, Iowa City, and the M.S. and Ph.D. degrees in physics from the University of Illinois, Urbana-Champaign.

He is currently an Instrument Scientist with the Applied Physics Laboratory, Johns Hopkins University, Laurel, MD, where he has calibrated imaging spectrometers and other space-based optical instruments from the far ultraviolet to the short-wave infrared.

Robert O. Green received the B.Sc. and M.Sc. degrees from Stanford University, Palo Alto, CA, and the Ph.D. degree from the University of California, Santa Barbara, investigating the spectroscopy of the three phases of water.

As a Senior Research Scientist with the Jet Propulsion Laboratory, California Institute of Technology, Pasadena, he is the Experiment Scientist for the NASA AVIRIS airborne imaging spectrometer as well as a co-investigator on the CRISM imaging spectrometer for Mars and the M3 imaging spectrometer for the Moon. His research area includes environmental imaging spectroscopy with a focus on water and also measurement calibration and validation.

Frank P. Seelos received the B.S. degree in physics and the B.A. degree in mathematics from Wofford College, Spartanburg, SC, and the A.M. and Ph.D. degrees in earth and planetary sciences from Washington University, St. Louis, MO.

He is currently the MRO CRISM Science Operations Lead and a Planetary Scientist with the Applied Physics Laboratory, Johns Hopkins University, Laurel, MD.

Kim D. Seelos received the B.S. degree in geology from the University of Georgia, Athens, and the A.M. and Ph.D. degrees in earth and planetary sciences from Washington University, St. Louis, MO.

She is currently a Postdoctoral Research Fellow with the Applied Physics Laboratory, Johns Hopkins University, Laurel, MD. She is involved in both CRISM mission operations and scientific research of the north polar region of Mars.

Terry Z. Martin received the A.B. degree from the University of California, Berkeley, and the Ph.D. degree from the University of Hawaii, Honolulu.

He is currently a Planetary Scientist with the Jet Propulsion Laboratory, California Institute of Technology, Pasadena, specializing in martian surface and atmospheric behavior.

Howard W. Taylor received the B.S. and M.S. degrees in electrical engineering, specializing in signal and image processing, from the University of Delaware, Newark.

He is currently with the Applied Physics Laboratory, Johns Hopkins University, Laurel, MD. His research interests include data compression, hyperspectral image compression, planetary imager calibration, and task automation.

Ralph E. Milliken received the B.S. degree from Indiana University, Bloomington, and the M.S. and Ph.D. degrees in geology from Brown University, Providence, RI.

He is currently a researcher with the Jet Propulsion Laboratory, California Institute of Technology, Pasadena. His research interests include remote sensing, mineralogy, and sedimentology/stratigraphy.

Bethany L. Ehlmann received the A.B. degree in earth and planetary sciences from Washington University, St. Louis, MO, and the M.Sc. degree in environmental change and management and the M.Sc. degree in physical geography from the University of Oxford, Oxford, U.K. She is currently working toward the Ph.D. degree in the Department of Geological Sciences, Brown University, Providence, RI.
