Emily B. Fox (S'06–M'09) received the S.B., M.Eng., E.E., and Ph.D. degrees from the Department of Electrical Engineering and Computer Science at the Massachusetts Institute of Technology, Cambridge, in 2004, 2005, 2008, and 2009, respectively.

She is currently a Postdoctoral Scholar in the Department of Statistical Science at Duke University. Her research interests are in Bayesian and Bayesian nonparametric approaches to multivariate time series analysis.

Dr. Fox is a recipient of both the National Defense Science and Engineering Graduate (NDSEG) and National Science Foundation (NSF) Graduate Research fellowships and currently holds an NSF Mathematical Sciences Postdoctoral Research Fellowship. She has also been awarded the 2009 Leonard J. Savage Thesis Award in Applied Methodology, the 2009 MIT EECS Jin-Au Kong Outstanding Doctoral Thesis Prize, the 2005 Chorafas Award for superior contributions in research and the 2005 MIT EECS David Adler Memorial 2nd Place Master's Thesis Prize.

Erik B. Sudderth (S'96–M'04) received the Bachelor's degree (*summa cum laude*) in electrical engineering from the University of California, San Diego and the Master's and the Ph.D. degree in electrical engineering and computer science from the Massachusetts Institute of Technology, Cambridge.

He is an Assistant Professor in the Brown University Department of Computer Science. His research interests include probabilistic graphical models; nonparametric Bayesian analysis and applications of statistical machine learning in computer vision, signal processing, artificial intelligence and geoscience.

Dr. Sudderth was awarded a National Defense Science and Engineering Graduate Fellowship (1999), an Intel Foundation Doctoral Fellowship (2004) and in 2008 was named one of "AI's 10 to Watch" by IEEE INTELLIGENT SYSTEMS MAGAZINE.

Michael I. Jordan (M'99–SM'01–F'05) received the Bachelor's degree in psychology from Louisiana State University, the Master's degree in mathematics from the Arizona State University, and the Ph.D. degree in cognitive science from the University of California, San Diego.

He is the Peohng Chen Distinguished Professor in the Department of Electrical Engineering and Computer Science and the Department of Statistics at the University of California, Berkeley. His research in recent years has focused on Bayesian nonparametric

analysis, probabilistic graphical models, spectral methods, kernel machines and applications to problems in signal processing, statistical genetics, computational biology, information retrieval and natural language processing.

Prof. Jordan was named to the National Academy of Sciences and the National Academy of Engineering in 2010. He is a Fellow of the American Association for the Advancement of Science. He has been named a Neyman Lecturer and a Medallion Lecturer by Institute of Mathematical Statistics. He is a Fellow of the IMS, the IEEE, the ACM, the AAAI, and the ASA.

Alan S. Willsky (S'70–M'73–SM'82–F'86) received the S.B. and Ph.D. degrees from the Department of Aeronautics and Astronautics, Massachusetts Institute of Technology (MIT), Cambridge, in 1969 and 1973, respectively.

He joined the faculty of MIT in 1973 and is the Edwin Sibley Webster Professor of Electrical Engineering and Director of the Laboratory for Information and Decision Systems. He was a founder of Alphatech, Inc., and Chief Scientific Consultant, a role in which he continues at BAE Systems Advanced

Information Technologies. From 1998 to 2002, he served on the U.S. Air Force Scientific Advisory Board. He has delivered numerous keynote addresses and is coauthor of the text *Signals and Systems*. His research interests are in the development and application of advanced methods of estimation, machine learning, and statistical signal and image processing.

Dr. Willsky has received a number of awards including the 1975 American Automatic Control Council Donald P. Eckman Award, the 1979 ASCE Alfred Noble Prize, the 1980 IEEE Browder J. Thompson Memorial Award, the IEEE Control Systems Society Distinguished Member Award in 1988, the 2004 IEEE Donald G. Fink Prize Paper Award, Doctorat Honoris Causa from Université de Rennes in 2005 and the 2009 Technical Achievement Award from the IEEE Signal Processing Society. In 2010, he was elected to the National Academy of Engineering. He and his students, have also received a variety of Best Paper Awards at various conferences and for papers in journals, including the 2001 IEEE Conference on Computer Vision and Pattern Recognition, the 2003 Spring Meeting of the American Geophysical Union, the 2004 Neural Information Processing Symposium, Fusion 2005 and the 2008 award from the journal *Signal Processing* for the outstanding paper in the year 2007.
