

Plate 5. Map of elevation versus roughness. Twelve subdivisions are defined on the basis of the divisions of elevation and roughness shown in Plates 2 and 3 and discussed in the text. Hue is used to show divisions in elevation and intensity to show divisions in roughness.

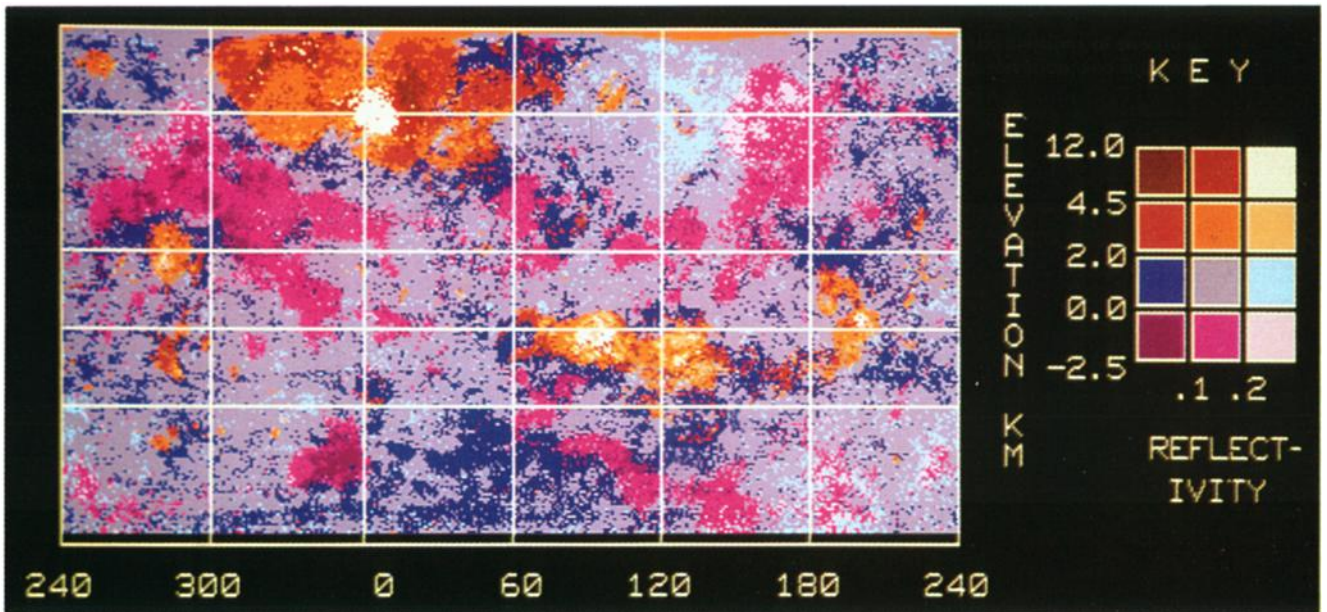

Plate 6. Map of elevation versus reflectivity. Twelve subdivisions are defined on the basis of the divisions of elevation and reflectivity shown in Plates 2 and 4 and discussed in the text. Hue is used to show divisions in elevation, and intensity to show divisions in reflectivity.
