

### CTU Team 4, Rotation Schedule

- 1) Residents will do brief handover rounds daily at 7:30 am with emphasis on new patients and major issues overnight.
- 2) Residents and Clinical Clerks examine patients and retrieve patient results after handover rounds or morning sessions. This should be completed by 10:00 am.
- 3) The Attending for the team does brief rounds at 10 am examining new patients and patients with new issues followed by teaching sessions, bedside teaching, reviewing radiology and other investigations as time permits. Rounds should be a maximum of 1½ hours.
- 4) The Attending supervises discharge-planning rounds with the Residents and Clinical Clerks. Discharge planning rounds take place on Wednesdays 10.00 am.
- 5) After attending rounds the Attendings supervise teaching sessions on the ward on the days when there are no scheduled noon rounds.
- 6) Discharges to be decided and completed early in the day in consultation with the Attending.
- 7) A brief discharge summary is MANDATORY on all admitted patients. Please ensure the front cover sheet is also filled out. Please refer to discharge dictation guidelines.
- 8) One resident should be the admitting and delivery room resident for the daytime. This could be the on call resident or not. When residents are on half day, they should sign their patients over to the other residents.
- 9) Vacation when approved by the attending for 1 week per month.
- 10) Appropriate daily progress notes and discharge summaries can be completed in the afternoons. The remaining residents will cover the post call resident patients. The Attending will be in house from 9-5pm. The on call pediatrician will be available after 5 pm for any ward issues, admissions, consults and labor and delivery.
- 11) Residents will present Pediatric Grand Rounds on the last Monday of the month and Perinatal rounds on the third Friday of the month. A LCD projector is available for the presentation.
- 12) Residents and Clinical Clerks are encouraged to attend the asthma education clinic and breastfeeding and newborn assessment (BANA) clinic in the afternoon, at least once during their rotation.

2010-08-18

13) On Call, the resident and clinical clerk will cover ER, NICU, Normal nursery and Labor and Deliver. The pager and key for the on call room can be obtained from switchboard on the main floor beside the information desk. When assessing a patient in the ER or on the Ward, if the patient appears unwell, call for help earlier rather than waiting till you have done a full history and physical. If you make a call switch, please inform Rosie Evered ext. 33585
