

Figure S2A,B Structural Alignment of UNC119 with PrBP/δ and RhoGDI (related to Figure 4). **(A)** UNC119 (red) (PDB 3RBQ) aligned with PrBP/δ (blue). The T α peptide is shown in dark gray and the acyl chain in green. Figure created with PyMOL (www.pymol.org). **(B)** UNC119 (red) aligned with RhoGDI (cyan). The T α peptide is shown in dark gray and the acyl chain in green. The geranylgeranyl chain of the GTPase CDC42 bound to RhoGDI is shown in light gray. Figures created with PyMOL (www.pymol.org).
