

4	VACCINATION POLICIES	99
4.1	Vaccination Problem	99
4.2	Budgeted Vaccination Problem	100
4.2.1	Sum-of-Squares Partition Problem	103
4.2.2	Budgeted Vertex Cover	106
4.2.3	Min-Max Degree	110
4.3	Restricted Disease Problem	113
4.3.1	Partial Vertex Cover	114
4.3.2	Restricted Max Degree	118
4.3.3	Discussion	122
4.4	Experimental Analysis of Simple Vaccination Policies	124
4.4.1	Improving on Simple Heuristics	140
5	BUDGETED MAXIMUM COVERAGE	148
5.0.2	Results	154
5.1	The Reward-Cost Model	155
5.1.1	Choosing Important Threads	155
5.1.2	Criteria for Participation	157
5.2	A Greedy Algorithm for BMOC	157
5.2.1	BMOC is Difficult to Approximate	159
5.2.2	The Overlap Condition	163
5.3	Experiments on BMOC	168
5.3.1	Greedy Performance	169
5.3.2	Analysis of Selected Users	170
5.3.3	Analysis of Selected Threads	173
5.3.4	An Upper-Bound to Greedy	175
6	CONCLUSIONS AND FUTURE WORK	180
6.1	Generating HCW Contact Networks	180
6.2	Random Graph Models of Contact Networks	181
6.3	Vaccination Policies	182
6.4	Budgeted Maximum Coverage	183
